Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 1-12,16-18 and 23-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/06.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 123-15 and 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "PPC" renders the claims indefinite, because the chemical represented by this abbreviation may change over time. Examiner suggests spelling out the term in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-15 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 6,258,195 to Holman et al.

Holman discloses a catheter with reinforced strands. The strands can be coated with a photosensitive polymerizable composition (PPC) resin (see column 7, lines 24-45). The UV curable material disclosed meets this broad limitation. Holman also teaches that the amount of UV curable material can be varied over the length of the catheter in order to vary the stiffness of the tubing. Holman also discloses coating the strands with an inner and outer layer of polymeric material (column 1, lines 36-38 and column 7, lines 5-6). Figures 7 and 8 illustrate the strands embedded with a polymeric material (80) (column 4, line 55 – column 5, line 3). The strands can be braided (column 1, line 38) or helical (column 6, line 45).
